NOTE ON THE METHODOLOGY OF THE AFGHANISTAN INDEX:

Although the footnotes to the Afghanistan Index document our sources in detail, it is worth noting here a few broad points. The majority of our information comes from the U.S. Government, though we must often analyze it and process it further to show trends over the full period since 2001. Some information comes from foreign journalists on the ground and from nongovernmental organizations; a very modest amount to date comes from Afghan sources. Most tables and charts are straightforward representations of data as we obtain it from the above primary sources, with only modest further analysis and processing required. However, a few graphics, such as those on crime and unemployment rates, require more methodological work (and more assumptions) on our part—and are as a result also perhaps somewhat less precise than most of the tables and charts.

Could not be attributed	0	249 (15%)	68 (5%)

***Through August 2008**

NOTE: Pro-Government Forces include Afghan Government and all international forces. Figures from 2006 and 2007 are from Human Rights Watch. 2008 figures provided by UN Assistance Mission for Afghanistan. UNAMA estimate for 2007 was 1,500 total such civilian fatalities. According to UNAMA, the total of 1,445 civilian fatalities through August 2008 compares with 1,040 through the same period in 2007 (representing an increase of 43%).

(FIGURE 1.2) U.S. TROOP FATALITIES SINCE OCTOBER 7, 2001²

Total from October 7, 2001 through December 15, 2008:

Fatalities (all kinds): **624**
 Fatalities in hostile incidents: **409**
 Fatalities in non-hostile incidents: **215**

* The actual figure for non-hostile fatalities is shown only for months in which there were more than 2 such incidents.

(FIGURE 1.5) U.S. TROOPS WOUNDED IN ACTION SINCE OCTOBER 7, 2001⁵

Total from October 7, 2001 through December 15, 2008: 2,606

The daily Department of Defense casualty reports that we use for our monthly estimates on U.S. troops wounded does not make it entirely clear when in a 24-hour period casualties were incurred. Since the reports are published at 10AM daily, there is possibility that our numbers for January 2005 and onwards are slightly off due to uncertainties about whether casualties occurred on the first or the last of each month.

(FIGURE 1.6) BRITISH MILITARY FATALITIES IN AFGHANISTAN SINCE THE START OF 2006⁶

Total through December 15, 2008: 133

NOTE ON THIS GRAPH: From 2002-2005, the British military suffered 5 fatalities that are reflected in the total.

(FIGURE 1.7) CANADIAN MILITARY FATALITIES IN AFGHANISTAN SINCE THE START OF 2006⁷

2007	56.5	142	169
2006	44.3	130	168
2005	39.2	125	167
2004	28.3	97	167
2003	40.2	134	166
2002	35.5	104	139

NOTE ON INDEX OF PRESS FREEDOM TABLE: The Index is based on a questionnaire with 50 criteria for assessing the state of press freedom in each country. It includes every kind of violation directly affecting journalists (such as murders, imprisonment, physical attacks and threats) and news media (censorship, confiscation issues, searches and harassment). In addition to taking into account abuses attributable to the state, those carried out by armed militias, clandestine organizations or pressure groups are also considered.

The lower the score attained, the higher the degree of press freedom in that respective country. Although there is no specific information given regarding how the overall score was compiled, the top-rated countries for 2007 received an overall score of 0.75, with the median receiving a score of 25.3. The overall average score for the 2007 Index was 31.5.

(FIGURE 2.12) AFGHANISTAN’S RANK IN TRANSPARENCY INTERNATIONAL’S ANNUAL CORRUPTION PERCEPTIONS INDEX (CPI)⁴²

YEAR	RANK	NUMBER OF COUNTRIES SURVEYED
2007	172 (T)	180
2006	NO DATA	163
2005	117 (T)	159

(T): Indicates years Afghanistan’s score tied with one or more other country.

NOTE ON THIS CHART: The CPI is a composite index that draws on 14 expert opinion surveys. It scores countries on a scale from zero to ten, with zero indicating high levels of perceived corruption and ten indicating low levels of perceived corruption. Due to a lack of reliable data, Afghanistan was not included in the CPI survey for the years 2006.

NOTE: 141 nations were surveyed. Each nation was allocated a score of 0-10 points for each of 4 broad categories (Economic, Political, Security, and Social Welfare). Overall scores were calculated by taking the average of the 4 scores. The median score (Benin, #71) received a score of 6.36 while the highest score (Slovak Republic, #141) received a score of 9.41.
